WORK EXPERIENCE

Software Engineer, CODWER | *Jun 2024 - Feb 2026 · 1 yr 9 mos | Hybrid*

- Built high-performance backend services with Python(FastAPI) and Go (Gin); designed RESTful and gRPC APIs
- Deployed production systems on AWS (EC2, S3, Lambda) with Docker and CI/CD pipelines
- Designed microservices architecture handling 10K+ daily requests with PostgreSQL and Redis
- Reduced API latency by 40% through caching, query optimization, and connection pooling
- Implemented message queues (RabbitMQ) for async processing and event-driven architecture

Machine Learning Engineer, Sigmoid | *Jul 2024 - Present · 2 yrs | Hybrid*

- Developing ML models using PyTorch and TensorFlow; building deployment APIs
- Mentoring junior ML engineers and contributing to R&D initiatives in generative AI
- Developed backend services with Golang Gin and FastAPI for model serving and data processing

Software Engineer, NULLPROJECT-DEV | *Apr 2023 - Jun 2024 · 1 yr 2 mos | Remote*

- Built backend services with Go and Python; developed REST APIs for data processing and integrations
- Integrated third-party APIs and implemented background workers for async tasks
- Designed database schemas with PostgreSQL; wrote migrations and optimized queries

EDUCATION

Bachelor of Science, English-Taught Honors Program in Software Engineering
Technical University of Moldova | 2022 - Present

LEADERSHIP

President, FAF NGO | *Oct 2023 - Oct 2025 · 2 yrs*

- Led a team of 5+ members, organized 5 hackathons and 3 conferences reaching 1000+ participants, facilitated 15+ workshops, and secured partnerships with 10+ industry sponsors
